

Year 1
Home Learning

Here are some topics which you can work from at home. All work can be recorded in a way that you choose.

English	Maths	Physical	Science	Creative
Rewrite any traditional tale. Consider changing a character to themselves. Remember to use your capital letters and full stops.	Practise counting in 2's, 5's and 10's. Put objects into groups of 2, 5 or 10.	Complete a 5 minute activity each day for a week (1 minute for each activity; counting star jumps, shuttle runs, hops, skipping).	Create a fact file relating to the different animal groups (mammals, fish, birds, reptiles and amphibians).	Create a 3D model of an Arctic animal e.g. polar bear, arctic hare or a killer whale.
Practise your handwriting, focusing on letter families and ensuring you have clear small, tall or tail letters.	Make a clock, using a paper plate or any other recyclable material, writing the numbers carefully, and practise telling the time to o'clock. Talk about the difference between the minute and hour hands.	Practise your Arctic animal yoga and teach the moves to someone else.	Create a weather chart by checking and identifying weather patterns daily. Think about temperature, rainfall and cloud cover, and think about suitable weather symbols to represent these.	Design and make a finger puppet to use in a performance of a traditional tale. This could be a character from the traditional tale that you may write.
Using the booklets provided, children to tick words they can blend and to circle words that they are unsure of. You could use these words and put them into sentences. The blending could be done daily.	Practise counting forwards and backwards using numbers between 0 – 125. You could also practise saying one more and one less of these numbers.	How many star jumps can you do in 1 minute?	Complete a scientific experiment at home, considering making a prediction and recording your findings to come up with a conclusion.	Using your imagination, create a Spring scene. These can be 2D or 3D and as creative as you wish.
Create your own story about an Arctic animal eg. polar bear, arctic hare or killer whale.	Learn a song about the days of the week or months of the year.	Go on GoNoodle.com and learn some more dance routines (we recommend the Zumba and KidzBop channels).	Sort different materials in your house into groups thinking about their properties, and consider whether they are man-made or natural materials.	Create portraits of your family and friends. As a challenge, you could use a different artistic technique for each portrait.

Please continue to support your child's learning by reading daily and using the phonics folders, as well as practising their spelling words and putting them into sentences on the back of the sheet.
