**Activity**

Look at the pictures on the following pages. They show design plans for different rooms. Each room contains a light source and partitions. The partitions are all the same size and go all the way up to the ceiling.

First, estimate the width of the shadow cast by the partition. Record this in the space provided.

Next, calculate the width of the shadow. Place your ruler so that it lines up the centre of the light source with one of the edges of the partitions. Draw a line from the edge of the partition to the wall. Repeat for the other edge of the partition. Use a pencil or black coloured pen to shade in the shadow that you have formed.

Use your ruler to measure the length of the shadow cast on the wall. Record this in the space provided.

## Comprehension

A man appeared on the corner the cat had been watching, appeared so suddenly and silently you'd have thought he'd just popped out of the ground. The cat's tail twitched and its eyes narrowed.

Nothing like this man had ever been seen on Privet Drive. He was tall, thin, and very old, judging by the silver of his hair and beard, which were both long enough to tuck into his belt. He was wearing long robes, a purple cloak that swept the ground, and high-heeled, buckled boots. His blue eyes were light, bright, and sparkling behind half-moon spectacles and his nose was very long and crooked, as though it had been broken at least twice. This man's name was Albus Dumbledore. Albus Dumbledore didn't seem to realize that he had just arrived in a street where everything from his name to his boots was unwelcome. He was busy rummaging in his cloak, looking for something. But he did seem to realize he was being watched, because he looked up suddenly at the cat, which was still staring at him from the other end of the street. For some reason, the sight of the cat seemed to amuse him. He chuckled and muttered, "I should have known."

He found what he was looking for in his inside pocket. It seemed to be a silver cigarette lighter. He flicked it open, held it up in the air, and clicked it. The nearest street lamp went out with a little pop. He clicked it again -- the next lamp flickered into darkness. Twelve times he clicked the Put-Outer, until the only lights left on the whole street were two tiny pinpricks in the distance, which were the eyes of the cat watching him.

1. What did the cat's tail and eyes do when Albus appeared?
2. Where are they both?
3. List 6 adjectives used to describe Albus Dumbledore.
4. What clothes was he wearing?
5. What did he click 12 times?
6. What did Albus say to the cat?
7. What did he change on the street?
8. What do you think happens next?
9. What tells us that the cat knows Albus?
10. How do you think he appeared in the street?
